### Comments

Since this is a continuation application, the Declaration filed herewith is a copy of that filed in connection with the parent Application Serial No. 09/141,126. With regard to the text of the specification, the Office is requested to note that a minor rearrangement of the introductory part of the application has been effected to render the various sections into the order which the Office apparently now prefers. Specifically, the reference to related applications section has been moved before the "Field of the Invention" section. Also, within the reference to related applications section, the previous first sentence (which refers to applications from which priority is not claimed) has been moved to the end. Finally, the specification has been amended to include all the minor corrections set out in the Amendment and Response dated January 26, 2001 in connection with the parent application. The parent application was filed with informal drawings which are unsuitable for publication. Accordingly, the drawings filed herewith are taken from US Patent No. 6,252,564. The application which issued as this patent was originally filed with informal drawings identical to those of the parent of the present application, and the enclosed formal drawings were substituted without objection by the Examiner. No new matter is introduced by these amendments.
